

DECEPTION RULES

By Mike Exton

The lies and deception throughout this world go much deeper and are much more pervasive than most people could ever imagine! Rampant lies and deceit are prevalent in our government (both parties!), educational system, health system, food industry, pharmaceutical industry, chemical industry, FDA (Food & Drug Administration), CDC (Center for Disease Control), EPA (Environmental Protection Agency), AMA (American Medical Association), ADA (American Dental Association), APA (American Psychological Association), WHO (World Health Organization), UN (United Nations), Mass Media (both print media and electronic media with the big news outlets such as CNN, FOX, ABC, CBS, NBC, etc. perhaps being the greatest sources of misinformation) and on and on and on it goes (please feel free to add to this list!); but let's not forget about all of the "charitable" organizations that are a farce (the CEO's often make over a million dollars a year and only about 10% of every dollar received actually goes to the needy: "charities" such as Goodwill Industries, American Red Cross, United Way, March of Dimes, and UNICF); but the greatest deception of all has to be all of this world's religious organizations: ouch! I'm afraid I'm going to step on some toes here: Islam, Buddhism, Confucianism, Hinduism, Jainism, Judaism, Shinto, Sikhism, Taoism, Zoroastrianism, etc., and yes, even "Christianity" (just for starters, think: Santa Claus, Easter Bunny, Crusades, and the Inquisition, not to mention hundreds of deceitful and unbiblical doctrines that are masquerading as true Christianity). Finally, let's not forget about atheism and the evolutionary hypothesis (we evolved from what? Total nonsense!). Deception rules just about everything, everywhere, everyday, and everyone (the average American lies 2-3 times in a ten-minute conversation and is lied to as many as 200 times a day!).
